Leading through Change

In today's fast-paced and forever-changing world, Executive and Senior Leaders need a new suite of tools to drive positive change. Ambiguity, complexity, uncertainty and rapid change are features of the new standard work environment.

Ecosystems of leaders across the entire organisation must lead organisational transformations. The harsh reality is that approximately 70% of change initiatives fail due to negative employee attitudes and unproductive management behaviour.

Change is about 'people' and 'process'. Every leader can positively influence an ever-green approach to change. Change is here to stay.

- Driving Positive change - every leader is in driver's seat.
- Appreciative Inquiry (A.I.) is a strengths-based, positive approach to organisational change. A.I. helps people achieve a shared vision for the future by engaging others in strategic innovation.
- Key factors of successful change
- Mastering your mindset and helping others to build perspective and bust bias
- The neuroscience of change at an individual level
- Leaders change tool kit | Change Models +
- What does resistance look like, and how to regain momentum
- Six thinking hats: efficient collaboration and problem-solving to build engagement and a well-thought-out strategy.

“
We wanted to start our two-day leadership conference with a 'wow factor'- A presenter that would set the tone and mindset for the two days. Jane Wundersitz delivered this in spades!
