Strengths-Based Approach

A strengths approach is a positive and collaborative approach, helping people to channel intrinsic motivation and core strength. Focusing on strengths does not mean ignoring challenges, or struggles. The strengths approach has broad applicability - but many are unsure of how to embed it.

There is strong evidence that use of a strengths-based approach can improve social networks and relationships, well-being, resilience and goal achievement. Strengths are also a path to resolving character conflict.

The TMS Team Management Profile (TMP) is one of the world's leading psychometric profiling tools for personal, team and leadership development. The TMP is not just about psychometrics, it's about learning. An understanding of the eight core activities (Types of Work) that all teams must do to be successful is critical for any individual in a work context.

Work preference psychometrics are then overlaid onto the Types of Work Wheel to identify an individual's work preferences and create their unique Team Management Profile.

PRISM Brain Mapping is a sophisticated, online, neuroscience-based instrument specifically designed to identify the behavioral preferences that directly relate to personal relationships and work performance. By studying the brain directly, we get to connect straight with the 'source' of human performance.

PRISM provides three distinct profiles, or 'maps', of a person's behaviour: how they naturally prefer to behave; the extent to which they feel it is necessary to modify that behaviour on occasions to achieve key objectives, and the overall pattern of behaviour that they tend to use for most of the time.

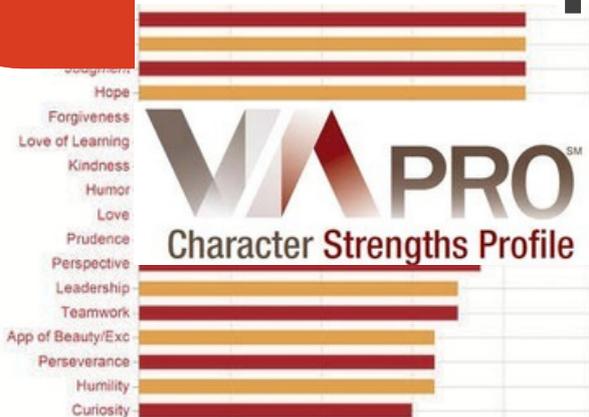

Neuroscience is by far the most exciting branch of science because the brain is the most fascinating object in the universe.

DiSC® assessments are used in thousands of organisations around the world, from sprawling government agencies and Fortune 500 companies to nonprofits and small businesses.

The reason is simple: DiSC® profiles help build stronger, more effective working relationships.

DiSC is an acronym that stands for the four main personality profiles described in the DiSC model:

- (D)ominance,
- (i)nfluence,
- (S)teadiness and
- (C)onscientiousness.

Fabulous for communication, sales and service teams and supports team building.

TRUST – over seven million people, in over 100,000 organisations, have taken a DiSC profile
